

Seth Nelson IT Specialist

Seth has brought his 9 years of experience as a Computer Consultant to TAF beginning in the Fall of 2007. He has experience as a Software Engineer, Web Developer, Database Developer/Administrator, Network Administrator, and general Help Desk consultant.

In the summer of 2007 Seth moved to Seattle from the east coast, following his then girlfriend (now fiancée) back to her home state to attend medical school at the UW. Having almost exclusively worked as a government contractor in the past, Seth probably wouldn't have pursued the path of a non-profit on his own. Little did he know that responding to a job posting seeking a part-time TechStart after-school instructor would set him on a completely new and exciting path. The more he learned about the people and programs at TAF, the more interested he became in being more involved in the organization. He was granted the opportunity to do just that as TAF's full-time IT Specialist in March of 2008.

Seth is very excited for what the future holds in store for TAF, and the integral part he will play in what is to come. He loves working with the kids, and making technology work for them and the staff at TAF. Every day is a new and exciting challenge on the road towards success for every child we serve.

For questions regarding IT at TAF,
please contact Seth at:
